

National Entrepreneurship Challenge (NEC)

E-Cell, IIT Bombay

Name: Bhoomireddi Janaki

Team Role: Component Sourcing & Supplies (Student Logistics)

My Motivation

My focus is on sourcing electronic components and supplies. Finding the right parts at reasonable prices is essential when working on a student project with a limited budget.

I compare prices across local electronics shops and online vendors, check delivery times, and make sure our team has the parts they need for testing. My motivation is to keep our hardware building schedule running without component delays.

My Expectations from E-Cell

I look to E-Cell for advice on sourcing components and finding reliable vendors for student hardware projects.

Through NEC, I hope to learn how to manage component lists efficiently, find student discounts on parts, and plan sourcing lead times effectively.
