

National Entrepreneurship Challenge (NEC)

E-Cell, IIT Bombay

Name: Tanara Mohan

Team Role: Hardware Section (Student Fabrication & Assembly)

My Motivation

Working in the hardware section alongside Rajesh, my drive comes from physical assembly and soldering. I focus on mounting components securely, cutting project boxes, and organizing our lab tools so that everything stays neat and safe.

It's really satisfying to see loose wires and components turn into a sturdy, handheld box. My focus is on making sure our hardware build is neat, durable, and doesn't fall apart during testing or transport.

My Expectations from E-Cell

I expect E-Cell to teach us practical hardware assembly techniques and safety measures for student projects.

Through NEC, I want to learn how to make clean product enclosures, protect circuits from overheating, and build reliable hardware prototypes on a student budget with guidance from workshop mentors.
