

NEC 2026 Submission - E-Cell IIT Bombay

Application File

Name: Althi Saipadma

Team Role: Digital Media & Web Support (Student Media & UI)

My Motivation

My motivation comes from design and digital media. I enjoy creating posters on Canva, managing our team's social media pages, and designing a simple, clean web interface for our project. Good visuals help people understand what our student team is building.

I want to make sure our app screens and digital content look friendly, professional, and easy to navigate for non-technical users. Presenting our project cleanly online gives our team a strong identity.

My Expectations from E-Cell

I look to E-Cell for guidance on simple UI/UX design principles and digital outreach for student startups.

I expect NEC to help me understand how to design user-friendly screens, showcase our project online effectively, and learn how small student teams can build an engaged audience for their ideas.
