

# NEC 2026 - E-Cell IIT Bombay

## Participant Submission

---

**Name:** Hasini Yedla

**Team Role:** User Feedback & Testing (Student Usability)

### My Motivation

I am motivated by user testing and gathering honest feedback. Technology should be easy and natural for anyone to use, not just for engineering students who built it.

I watch how people interact with our prototype, note down where they get confused, and share that feedback with our hardware and software teammates. My goal is to make our project user-friendly and helpful for everyday people.

### My Expectations from E-Cell

I expect E-Cell to guide us on effective user testing and feedback collection methods for student projects.

I want to learn how to conduct user testing sessions, turn feedback into quick design improvements, and ensure our project makes a positive impact in our community.
