

E-Cell IIT Bombay - NEC Challenge

Team Titan Candidate Profile

Name: Lokavarapu Govindu

Team Role: Finance & Project Costs (Student Budgeting)

My Motivation

My interest is in tracking our team's project expenses and budgeting. As students, we work with limited funds, so it's important to track every rupee spent on components, prototyping materials, and travel for testing.

I keep track of component costs and help calculate how much our product would cost if we produced it for real users. My goal is to make sure our student project remains financially practical and affordable.

My Expectations from E-Cell

I am looking to E-Cell for simple, practical advice on startup budgeting and cost management.

I expect NEC to teach us how to estimate product manufacturing costs, manage small project budgets efficiently, and understand how student startups can apply for small grants and competition funding.
