

National Entrepreneurship Challenge Submission

IIT Bombay E-Cell

Name: Yagnasri Beela

Team Role: Quality & Testing Checks (Student QA)

My Motivation

My motivation comes from testing our setup to make sure nothing breaks during demonstrations. In student projects, loose wires or code bugs can cause unexpected failures during presentations.

I run basic testing routines--checking battery connections, testing sensor responses, and verifying that the app doesn't crash. My goal is to ensure our prototype works reliably every time we show it to mentors or judges.

My Expectations from E-Cell

I expect E-Cell to guide our team on basic testing practices and quality checks for student prototypes.

I want to learn how to build simple test checklists, prevent hardware short-circuits, and make sure our project is reliable and ready for competition judging.
